

ABSTRACT

A game for a wagering gaming device including an award indicator having a plurality of player selectable symbol indicators, a plurality of first award symbols and a plurality of second award symbols. The game also
5 includes a plurality of activatable symbol indicators which are positioned adjacent to the first award symbols and the second award symbols. The gaming device enables a player to select one of the symbol indicators adjacent to the first award symbols and one of the symbol indicators adjacent to the second award symbols in a game. The gaming device then moves or
10 rotates the award indicator. When the award indicator stops rotating, the activated symbol indicators indicate award symbols. The gaming device then provides the first and second awards associated with the indicated first and second award symbols to the player.
